About Ztringz

ZtringZ is made from leftover materials from the textile industry.

In our opinion this is a sustainable way to get rid of 'waste'.

Because it is leftover material, the collection is constantly changing, that's why it follows fashion closely.

You can use ZtringZ to crochet, knit, braid, weave or knot.

Beside making bags, you can also make amazing home accessories.

Such as a crocheted footstool, a knotted or woven rug or crochet potholders.

But also a jewel made from a scrap of ZtringZ with some beads it gives a great result.

Even in the garden a piece of ZtringZ is useful to bind plants. because of it's elastic characteristic the twig can continue to grow.

What ever you do with it, mostly you will have a result fast.

ZtringZ en Recht en Averecht

The colors you see on the website we currently have in stock, we generally have 3 to 4 spools in stock unless otherwise stated.

We can't reorder any colors as it is waste material, so please order enough for your project.
