

### Using the knitting fork or lucet

Pull the chosen yarn through the hole and wrap the yarn in 8-shape around the legs of the fork.

Lift the bottom loop over the top loop, as with knitting.

Turn the fork a 1/2 turn and keep the yarn above the loops, pull the loop over the yarn. Repeat this.

Depending on how strong you pull the yarn it creates a tight cord or a loose cord.

The knitting fork is suitable for all types of yarn.
